

# Kashyap Prajapati

Windsor, Ontario, Canada | [prajapatikashyap97@gmail.com](mailto:prajapatikashyap97@gmail.com) | [Website](#) | [LinkedIn](#) | [Github](#)

## SUMMARY

Computer Engineer with 3+ years of hands-on experience as a Full Stack Developer with excellent problem-solving and troubleshooting skills. Worked within Agile software development lifecycle and cross-functional teams aiming at delivering quality products

## EDUCATION

**The University Of Windsor, Ontario, Canada**

**GPA 3.5/4**

Master of Electrical and Computer Engineering

September 2020 - January 2022

**Gujarat Technological University, Ahmedabad, Gujarat, India**

**GPA 3.4/4**

Bachelors of Computer Engineering

April 2014 - April 2018

## SKILLS

**Web Technologies:** HTML, CSS, JavaScript(ES6+), Typescript, Bootstrap, REST API, GraphQL

**Frameworks/Tools:** React, NextJS, Angular, Redux, Node.js, Express.js, NPM, Yarn, Git, Jest, Tailwind

**Programming Languages:** C++, Python, Java

**Cloud/tools:** AWS, GCP, Docker

**Database/Tools:** MongoDB, Mongoose, SQL, Postgres

**Team Management/communication tools:** Slack, Zoom, Trello, Jira, Replicon, Airtable, Gitlab, Github

## EXPERIENCE

**Full stack Engineer at Elastic Path**

April 2022 - April 2023

- Wrote clean, testable code with unit tests on client projects using modern technologies like Javascript/Typescript, Node.js, React/Next.JS, GraphQL, and Jest, resulting in a 30% reduction in bug-related delays and a 25% increase in overall code quality
- Optimized application performance by identifying, refactoring inefficient code and adding new features, resulting in a 20% increase in speed
- Proposed and lead technical sessions around best practices for the team including Test Driven Development, Frontend and backend
- Attended 100+ daily standup meetings to communicate task updates and receive mentorship from senior engineer
- Performed code reviews on Pull requests/Merge requests, and provided technical feedback to improve code
- Deployed Serverless functions using AWS Lambda, Serverless framework and developed custom integrations for third-party tools

**Full stack Developer at Akar Infosoft**

October 2019 - April 2020

- Designed and developed dynamic web applications using HTML5, CSS3, Bootstrap, JavaScript, React, Redux, Node.js, REST API
- Remodelled modules to introduce single responsibility in components, mitigating the code duplicity by 60% and optimized, increasing the code readability, extensibility and testability
- Introduced Jest unit test and maintained 100% code coverage
- Collaborate with cross-functional teams of engineers and UI/UX designers to create advanced, elegant and efficient applications
- Addressed and improved technical issues with different client projects platform

**Full stack Developer Intern at Simulas**

January 2019 - August 2019

- Worked on multiple full-stack application projects in the MERN stack.
- Built interactive consumer data from multiple applications and RESTfully abstracted to the UI through a Node.js backend
- Enhanced several modules such as User Profile, Payment Gateway implementation
- Received guidance and mentorship from senior developers regarding best practices of web development
