PROJECTS

Ecommerce Website- Akar Enterprise

- Designed and developed dynamic ecommerce website to buy and sell Hardware and Home appliance using HTML, CSS, JavaScript, Node.js, Bootstrap.

- Implemented customer oriented functionalities like responsive filters for product types, prices and manufacturers, Wishlist, shopping and search history-based product recommendations, products inventory.

An NGO Website- YUVA NGO

- Designed and developed dynamic website for an NGO using HTML, CSS, JavaScript, EJS6, Node.js, Bootstrap.

- It had features like new events notifications, members and volunteers profile, donation portal. Also added the social work done in the past with photos and a little description in carousel using Bootstrap and added grid.

Dating site for Dogs(fun project)

- This is basically a fun project, which I try to learn about front-end development.

- Designed and developed dynamic dating website for dogs using HTML, CSS, Bootstrap.

- Basic structure of HTML and dynamic styes for CSS were used in it. Bootstrap was used for carousel and some other parts.
